

Call Waiting

With Call Waiting, a gentle beep will let you know another call is coming in. You can finish your original call, swap between calls or continue with the current call. In the latter case, the caller will be advised to call back later. Call Return 1471 can be used to find the second caller's number if available

Instructions For Use

You can use your keypad on the telephone to perform the following functions

To Activate Call Waiting

1. Dial *43#

To Cancel Call Waiting

1. Dial #43#

To see if Call Waiting is set up on your line
